

Our Story is Your Story!

Thank you for the Past, Present and Future

Dear aeoon family member,

We are celebrating our 10th anniversary from the 12th to the 16th of July 2021. You have been a big part of our success and we would not be where we are right now without you. We hoped to share this occasion with you personally, but unfortunately we cannot due to the current external environmental issues.

Over the past 10 years, aeoon has become known as a manufacturer of the fastest and best industrial digital printers in the world. Our combined success proves that together we have taken the right path and will continue for many years to come. We have never ending passion for technology, and an unmatched desire provide the best products for you – our customers. To ensure our products provide everything they were designed to do we have assembled a first class support team who live and love our home country, because we can proudly say „Made in Austria“.

Over these past 10 years we have experienced ups and downs, good and bad times, success and challenges, but most importantly we have grown and become stronger company.

Covid-19 threw us a curveball, but we were able to pivot and use the time to develop, implement and complete several strategic projects which will position us even stronger in the future. This means maintaining our position on the world market in the field of digital printing and further distinguishing ourselves from other manufacturers in terms of quality, support, sustainability and creativity.

The irony is, we have spent more than 1/10 of our history in a pandemic, but this has brought positive effects in all areas. We can say the pandemic has encouraged us and we have become stronger.

The physical distance (quarantine) dictated by pandemic has highlighted the importance of digital channels more than ever. The understanding and adoption of digitalization has accelerated the migration from analog faster than in pre-pandemic times. In these difficult times there has also been positive effects for our industry, which we should now use together. Print on Demand will be the future!

Sustainability has become more of a public focus or effect of the pandemic that should not be neglected. We have always focused on sustainability since the very beginning of our company and are prepared to share our story. Sustainability for us means not only Ökotex (GOTS 6.0) and water-based inks, we also take responsibility over our region, nature, employees and their families.

We have also developed digitally in some areas, we have created the „aeoon digital institute“ (training, education and support), which will support you in all areas in the future. This also includes the „aeoon interACTIVE App,“ our analysis dashboard which entails metrics to help optimize your workflow, to reduce costs and increase your sales through efficiencies.

Our centerpiece is the Innovation Center, which opened in 2020, with a goal to provide best in class service and support training within the DTG industry. Located in an over 700 m² space at the company's headquarters in Austria, a professional and experienced team is dedicated to optimize workflow, print quality, production capacity, environmental protection and other significant challenges of our customers. With the experience gained from the Innovation Center, which also has its own laboratory, we can continuously improve our support service.

We welcome you to our Innovation Center and look forward to meeting you again in person for an exciting exchange of ideas. We would not be where we are today without you, and we value all of our Aeoon Family members who have helped us become the market leader providing the best DTG solutions from our headquarters in Austria.

Our Story is Your Story ...and our common future is NOW!

I thank you for your trust, loyalty and respect during the last year(s) and I am looking forward to our further successful cooperation and growth together.

Yours sincerely

Angelo Schiestl
CEO aeoon Technologies with team

Upcoming Highlights

aeoon family history

Have a look behind the curtain and see how aeoon Technologies has developed over the years. We talk about the first steps that started with an idea and led into a leading DTG printing manufacturer. You will hear what it's like to work for aeoon, about our achievements and much more...

Direct Print IQ - One of our distributors takes you on a customer experience journey

Take a look and see how aeoon can positively impact your business in all areas. Print on demand is the future with the right DTG machines.

Welcome to our new Innovation Center Presentations, training and sample creation all from one source!

With the innovation center's opening in 2020, aeoon technologies launched a long-term strategy that will provide unparalleled service and support within the DTG industry. On a level with more than 700m² in the corporate headquarter, a professional and experienced team has been dedicated to optimizing workflow, print quality, output, and further relevant challenges of our clients.

Print on Demand is the Future – Start thinking about automation!

Maintain overview, increase performance –and reduce costs. Our DTG machines make the integration into popular e-commerce providers like Shopify™, Shopware™ along with social media marketplaces like Instagram™, Facebook™ easier than ever before. They make the shop floor processes and production process efficient and fast.
