

Compact Micro

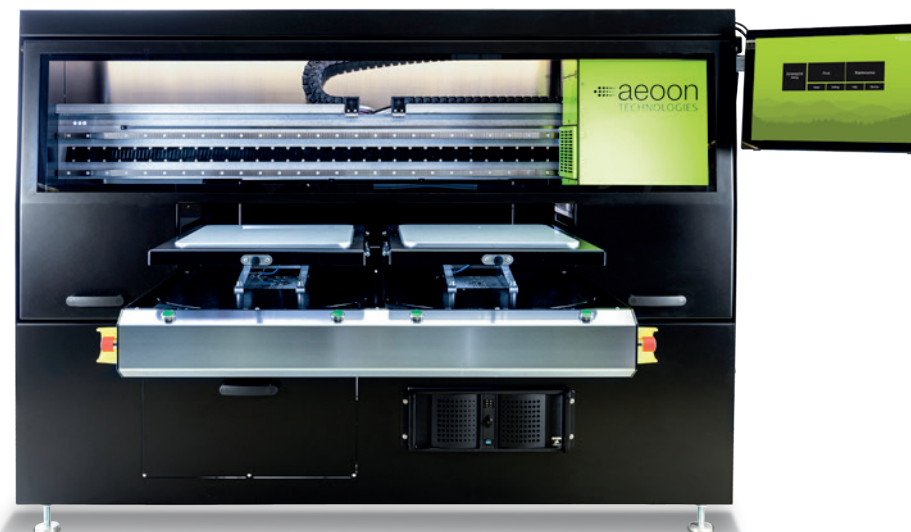

The Compact Micro is our newest arrival to our line of industrial systems. In developing it, we identified a market need for a smaller footprint and price point for small to midsize shops looking for industrial output, low cost per print and premium print quality. With the growth within the short run, one off market, the Compact Micro is the ideal system to help grow your business.

The Compact Micro offers BIG performance in a small package and is perfectly suited to start a small to medium-sized digital T-shirt printing business. Maximum performance was our goal with the system and we believe we delivered - aeoon's smallest machine will have a massive impact on the market.

Industrial Printheads	● 6 or 8
Ink Channel	● CMYK + 2 white or CMYK + 4 white
Printing Tables	● 2
Max. pallet size	● 40 x 45 cm; 15,7 x 17,7 in

Features:

- Latest software version
- Independent print queues
- Easy usability
- Improved automation functionality
- Improved integrations platform
- Industrial standard equipment
- Industrial printheads with 600 dpi native resolution up to 2400 dpi
- Simplified workflow processes
- Automatic cleaning and capping station
- Workflow automation available

aeoon's DTG printer series . made in Austria . distributed worldwide

aeoon Compact Micro – The simplest way of industrial DTG printing

Our inks are GOT's & ÖkoTex certified and fulfil the highest quality demands on the biggest colour range in the market of CMYK and colour brightness. The inks are water based, meet the highest standards and are environment-friendly.

Our technicians will give you a training on how to handle the equipment to facilitate your path towards a better understanding of the printer. In case of questions or problems, our dedicated support will do their utmost to help you.

aeoon Technologies has developed with partners a custom automation workflow that responds to the needs of a fast-moving society and industry by implementing an efficient device communication that makes the human-machine interaction run smoothly and fast.
